SPEED-TIME GRAPHS Speed-Time graphs are also called Velocity-Time graphs. Speed-Time graphs look much like Distance-Time graphs. Be sure to read the labels!! Time is plotted on the X-axis. Speed or velocity is plotted on the Y-axis. A straight horizontal line on a speed-time graph means that speed is constant. It is not changing over time.

13:1 - Sound - Note: I removed the Mach number (660 mph). It didn't agree with the 340 m/s speed of sound in air I was using. Here's the deal: air's density and sound's speed in that air decreases with altitude. At 35,000 ft the speed of sound is 660 mph (only 293 m/s). I didn't have time on the worksheet to explain this, so I removed it.

The multiplier and the multiplicand are also called factors. The answer to a multiplication problem is called the product. Another way to look at the equation is in terms of addition: $2 + 2 + 2 = 6$. So multiplication is a handy shortcut to adding groups of a number together. Multiplication has properties that are unique to its operation.
